

# New York's Tax Levy "Cap" Formula:

## How does it add up?

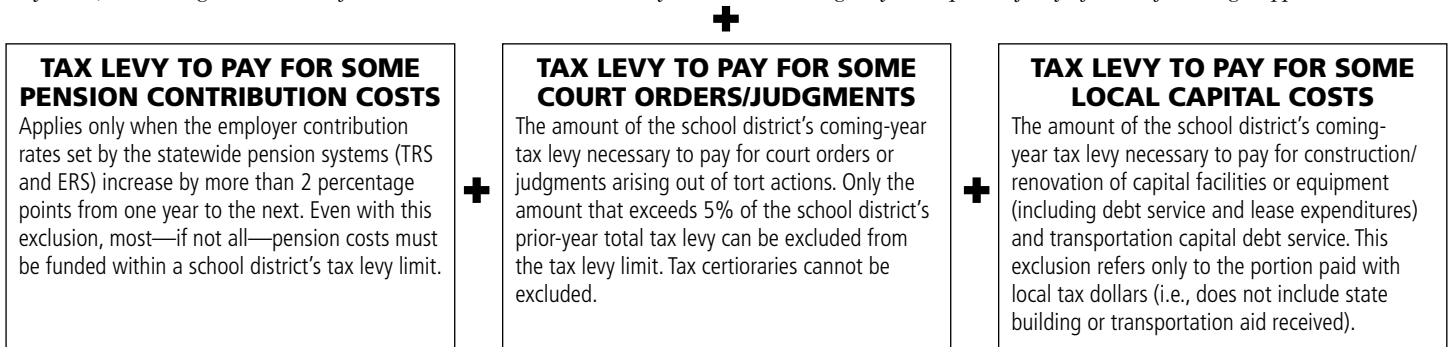

Although often referred to as a "2 percent tax cap," New York's tax levy "cap" law does not restrict any proposed tax levy increase to 2 percent. Pursuant to the law, each school district must follow an 8-step calculation, outlined below, to calculate its individual "tax levy limit." That limit then determines what level of voter support is required for budget approval.

### THE BASE FORMULA

### EXCLUSIONS TO BE ADDED

The law excludes certain portions of a school district's tax levy from the calculation above. A district can add these exclusions (described below) to its tax levy limit, increasing the amount of taxes the district is allowed to levy while still needing only a simple majority of voters for budget approval.

### MAXIMUM ALLOWABLE TAX LEVY

= The tax levy limit plus exclusions. This is the highest total tax levy that a school district can propose as part of its annual budget for which only the approval of a simple majority of voters (50% + 1) is required.
